

## ParaTuff® MIL-TAC Cable Repair Kit

### Description

The FIRK-01 ParaTuff® MIL-TAC Cable Repair Kit has been developed to offer fast in-field repairs to damaged Multimode and Single Mode MIL-TAC fibre optic cable.

The field splice enclosure features a rugged, fully sealed, rigid design with strain relief for standard 2 or 4 channel tactical cable. The universal design allows the use of Corning CamSplice™ and 3M FibrLok™ mechanical splices and also fusion splices. The Kit comes complete with a Sumitomo Precision Cleave Tool.

- For use with cables of cables of 5mm to 6.5 mm OD
- Suitable for up to 12 Core fibre
- Allows the use of mechanical splicing or fusion splicing
- Tight Buffered, Loose Tube, MIL-TAC or Broadcast cable
- Strain relief components
- Rubber Water seals
- Cable tie securing grooves

The FIRK-01 Kit is a full field tool kit complete with heavy duty fitted carry case and includes 2x emergency repair enclosures, a performance cleave tool and all of the tools and consumables required to repair tactical cables in the field.

The kit comes with a set of step by step instructions to guide the user through the repair procedure and a user manual is provided with the performance optical cleave tool.
